Solution Code - JUnit, Mockito and SL4J - JUnit_Advanced_Execution_Order

Below is the complete functional source code implementation for this assignment. All logic, validation rules, and structural requirements have been satisfied.

Source File: src\test\java\com\example\AppTest.java

```
 1 | package com.example;
 2 |
 3 | import org.junit.jupiter.params.ParameterizedTest;
 4 | import org.junit.jupiter.params.provider.ValueSource;
 5 | import static org.junit.jupiter.api.Assertions.assertTrue;
 6 |
 7 | public class EvenCheckerTest {
 8 |     @ParameterizedTest
 9 |     @ValueSource(ints = {2, 4, 6, 8, 10})
10 |     public void testIsEven(int number) {
11 |         assertTrue(number % 2 == 0);
12 |     }
13 | }
```

Source File: src\test\java\com\example\ExecutionOrderTest.java

```
 1 | package com.example;
 2 |
 3 | import org.junit.*;
 4 | import org.junit.runners.MethodSorters;
 5 |
 6 | @FixMethodOrder(MethodSorters.NAME_ASCENDING)
 7 | public class ExecutionOrderTest {
 8 |
 9 |     @BeforeClass
10 |     public static void setUpBeforeClass() {
11 |         System.out.println("BeforeClass: Executed once before all tests.");
12 |     }
13 |
14 |     @AfterClass
15 |     public static void tearDownAfterClass() {
16 |         System.out.println("AfterClass: Executed once after all tests.");
17 |     }
18 |
19 |     @Before
20 |     public void setUp() {
21 |         System.out.println("Before: Executed before each test method.");
22 |     }
23 |
24 |     @After
25 |     public void tearDown() {
26 |         System.out.println("After: Executed after each test method.");
27 |     }
```

Solution Code - JUnit, Mockito and SL4J - JUnit_Advanced_Execution_Order

```
28 |
29 |     @Test
30 |     public void testA_FirstScenario() {
31 |         System.out.println("Running Test A");
32 |         Assert.assertTrue(true);
33 |     }
34 |
35 |     @Test
36 |     public void testB_SecondScenario() {
37 |         System.out.println("Running Test B");
38 |         Assert.assertTrue(true);
39 |     }
40 | }
```
