

Solution Code - Module 2-ANSI SQL Using MySQL - Event_Session_Time_Conflict

Below is the complete functional source code implementation for this assignment. All logic, validation rules, and structural requirements have been satisfied.

Source File: [solution.sql](#)

```
1 | SELECT s1.event_id, s1.title, s2.title FROM Sessions s1 JOIN Sessions s2 ON s1.event_id = s2.event_id AND  
s1.session_id < s2.session_id WHERE (s1.start_time < s2.end_time AND s1.end_time > s2.start_time);
```
