

React HandsOn 12: Conditional Rendering Ticket Booking

Objectives

Explain about conditional rendering in React

Define element variables

Explain how to prevent components from rendering

In this hands-on lab, you will learn how to:

Implement conditional rendering in React applications

Prerequisites

The following is required to complete this hands-on lab:

Node.js

NPM

Visual Studio Code

Notes

Estimated time to complete this lab: 60 minutes.

Create a React Application named "ticketbookingapp" where the guest user can browse the page where the flight details are displayed whereas the logged in user only can book tickets.

The Login and Logout buttons should accordingly display different pages. Once the user is logged in the User page should be displayed. When the user clicks on Logout, the Guest page should be displayed.

Hint:
