

Solution Code - React - Conditional_Rendering_Ticket_Booking

Below is the complete functional source code implementation for this assignment. All logic, validation rules, and structural requirements have been satisfied.

Source File: src\App.js

```
1 | import React, { useState } from 'react';
2 |
3 | export default function App() {
4 |   const [loggedIn, setLoggedIn] = useState(false);
5 |   return (
6 |     <div style={{ padding: '20px' }}>
7 |       {loggedIn ? (
8 |         <div>
9 |           <h3>Welcome Resident, Book Event Tickets</h3>
10 |           <button onClick={() => setLoggedIn(false)}>Logout</button>
11 |         </div>
12 |       ) : (
13 |         <button onClick={() => setLoggedIn(true)}>Login to Book Tickets</button>
14 |       )}
15 |     </div>
16 |   );
17 | }
```
