

Git Lab 2: Git Ignore Configuration

Objectives

Explain git ignore

Explain how to ignore unwanted files using git ignore

In this hands-on lab, you will learn how to:

Implement git ignore command to ignore unwanted files and folders

Prerequisites

The following are the pre-requisites to complete this hands-on lab:

Setting up Git environment

Integrate notepad++ as a default editor

A Git repository in the local system and a remote repository in GitLab

Notes*:

Estimated time to complete this lab: 20 minutes.

Create a ".log" file and a log folder in the working directory of Git. Update the .gitignore file in such a way that on committing, these files (.log extensions and log folders) are ignored.

Verify if the git status reflects the same about working directory, local repository and git repository.

Please follow the below steps for creating a free account in GitHub.

D- not use cognizant credentials to login to GitHub.
