

PL/SQL Exercise 2: Error Handling

Exercise 2: Error Handling

Scenari- 1: Handle exceptions during fund transfers between accounts.

Question: Write a stored procedure SafeTransferFunds that transfers funds between two accounts. Ensure that if any error occurs (e.g., insufficient funds), an appropriate error message is logged and the transaction is rolled back.

Scenari- 2: Manage errors when updating employee salaries.

Question: Write a stored procedure UpdateSalary that increases the salary of an employee by a given percentage. If the employee ID does not exist, handle the exception and log an error message.

Scenari- 3: Ensure data integrity when adding a new customer.

Question: Write a stored procedure AddNewCustomer that inserts a new customer into the Customers table. If a customer with the same ID already exists, handle the exception by logging an error and preventing the insertion.
