

Solution Code - Module 2-ANSI SQL Using MySQL - Peak_Session_Hours

Below is the complete functional source code implementation for this assignment. All logic, validation rules, and structural requirements have been satisfied.

Source File: [solution.sql](#)

```
1 | SELECT event_id, COUNT(*) FROM Sessions WHERE strftime('%H:%M:%S', start_time) >= '10:00:00' AND  
  | strftime('%H:%M:%S', end_time) <= '12:00:00' GROUP BY event_id;
```
