

Solution Code - Engineering concepts - DesignPatterns - Builder_Pattern

Below is the complete functional source code implementation for this assignment. All logic, validation rules, and structural requirements have been satisfied.

Source File: ComputerBuilder.java

```
1 | public class ComputerBuilder {
2 |     private String CPU;
3 |     private String RAM;
4 |
5 |     public static class Builder {
6 |         private String CPU;
7 |         private String RAM;
8 |         public Builder setCPU(String c) { this.CPU = c; return this; }
9 |         public Builder setRAM(String r) { this.RAM = r; return this; }
10 |         public ComputerBuilder build() { return new ComputerBuilder(this); }
11 |     }
12 |
13 |     private ComputerBuilder(Builder b) {
14 |         this.CPU = b.CPU;
15 |         this.RAM = b.RAM;
16 |     }
17 | }
```
