

Spring Core Exercise 3: Setter Dependency Injection

Exercise 3: Implementing Logging with Spring AOP

Scenario:

The library management application requires logging capabilities to track method execution times.

Steps:

Add Spring AOP Dependency:

Update pom.xml to include Spring AOP dependency.

Create an Aspect for Logging:

Create a package com.library.aspect and add a class LoggingAspect with a method to log execution times.

Enable AspectJ Support:

Update applicationContext.xml to enable AspectJ support and register the aspect.

Test the Aspect:

Run the LibraryManagementApplication main class and observe the console for log messages indicating method execution times.
