

Solution Code - Module 2-ANSI SQL Using MySQL - Average_Session_Duration_per_Event

Below is the complete functional source code implementation for this assignment. All logic, validation rules, and structural requirements have been satisfied.

Source File: [solution.sql](#)

```
1 | SELECT event_id, AVG((julianday(end_time) - julianday(start_time)) * 1440) as avg_duration_minutes FROM  
Sessions GROUP BY event_id;
```
