

Solution Code - Angular - Services_and_Dependency_Injection

Below is the complete functional source code implementation for this assignment. All logic, validation rules, and structural requirements have been satisfied.

Source File: srclapplapp.component.ts

```
1 | import { Component, OnInit } from '@angular/core';
2 | import { CommonModule } from '@angular/common';
3 | import { StudentService } from './student.service';
4 |
5 | @Component({
6 |   selector: 'app-root',
7 |   standalone: true,
8 |   imports: [CommonModule],
9 |   providers: [StudentService],
10 |   template: `
11 |     <ul><li *ngFor="let s of students">{{ s }}</li></ul>
12 | `
13 | })
14 | export class AppComponent implements OnInit {
15 |   students: string[] = [];
16 |   constructor(private studentService: StudentService) {}
17 |   ngOnInit() { this.students = this.studentService.getStudents(); }
18 | }
```

Source File: srclapplstudent.service.ts

```
1 | import { Injectable } from '@angular/core';
2 |
3 | @Injectable()
4 | export class StudentService {
5 |   getStudents() { return ['Alice', 'Bob', 'Charlie']; }
6 | }
```
