

Solution Code - Engineering concepts - DesignPatterns - Dependency_Injection

Below is the complete functional source code implementation for this assignment. All logic, validation rules, and structural requirements have been satisfied.

Source File: DIDemo.java

```
1 | interface CustomerRepository { String getCustomerName(); }
2 | class CustomerRepositoryImpl implements CustomerRepository { public String getCustomerName() { return
"John Doe"; } }
3 |
4 | class CustomerService {
5 |     private CustomerRepository repo;
6 |     public CustomerService(CustomerRepository r) { this.repo = r; }
7 |     public String fetchCustomer() { return repo.getCustomerName(); }
8 | }
```
