

React HandsOn 9: ES6 Cricket Players Map

Objectives

List the features of ES6

Explain JavaScript let

Identify the differences between var and let

Explain JavaScript const

Explain ES6 class fundamentals

Explain ES6 class inheritance

Define ES6 arrow functions

Identify set(), map()

In this hands-on lab, you will learn how to:

Use map() method of ES6

Apply arrow functions of ES6

Implement Destructuring features of ES6

Prerequisites

The following is required to complete this hands-on lab:

Node.js

NPM

Visual Studio Code

Notes

Estimated time to complete this lab: 60 minutes.

Create a React Application named "cricketapp" with the following components:

ListofPlayers

Declare an array with 11 players and store details of their names and scores using the map feature of ES6

Filter the players with scores below 70 using arrow functions of ES6.

IndianPlayers

Display the Odd Team Player and Even Team players using the Destructuring features of ES6

Declare two arrays T20players and RanjiTrophy players and merge the two arrays and display them using the

Merge feature of ES6

Display these two components in the same home page using a simple if else in the flag variable.

Output:

When Flag=true

When Flag=false

Hint:
