

## Universal Element and Class Selectors

---

### 3. Selectors Playground

Scenario: You need to style various elements based on IDs, classes, and element types.

Objective: Master different selector types.

Task:

- Use:
- Universal selector `*` to reset margin/padding
- Element selector `h2` to style all `<h2>`
- ID selector `#mainHeader` for the banner
- Class selector `.eventCard` for event containers
- Grouping selector for `h3, p` to style together
