

Solution Code - Engineering concepts - DesignPatterns - Strategy_Pattern

Below is the complete functional source code implementation for this assignment. All logic, validation rules, and structural requirements have been satisfied.

Source File: PaymentStrategy.java

```
1 | interface PaymentStrategy { void pay(double amt); }
2 | class PayPalPayment implements PaymentStrategy { public void pay(double amt) {
System.out.println("PayPal: " + amt); } }
3 |
4 | class Context {
5 |     private PaymentStrategy strategy;
6 |     public void setStrategy(PaymentStrategy s) { this.strategy = s; }
7 |     public void executePayment(double amt) { strategy.pay(amt); }
8 | }
```
