

Solution Code - Spring REST using Spring Boot - REST_Validation_Errors

Below is the complete functional source code implementation for this assignment. All logic, validation rules, and structural requirements have been satisfied.

Source File: `src\main\java\com\example\rest\RestApplication.java`

```
1 | package com.example.rest;
2 |
3 | import org.springframework.boot.SpringApplication;
4 | import org.springframework.boot.autoconfigure.SpringBootApplication;
5 | import org.springframework.web.bind.annotation.*;
6 | import jakarta.validation.Valid;
7 | import jakarta.validation.constraints.*;
8 |
9 | class UserDto {
10 |     @NotBlank(message = "Username must not be blank")
11 |     private String username;
12 |
13 |     @Email(message = "Email must be valid")
14 |     private String email;
15 | }
16 |
17 | @RestController
18 | @RequestMapping("/api/users")
19 | class UserController {
20 |     @PostMapping
21 |     public String registerUser(@Valid @RequestBody UserDto user) {
22 |         return "User registration valid!";
23 |     }
24 | }
25 |
26 | @SpringBootApplication
27 | public class RestApplication {
28 |     public static void main(String[] args) {
29 |         SpringApplication.run(RestApplication.class, args);
30 |     }
31 | }
```
