

Solution Code - Angular - Reactive_Forms_and_Validation

Below is the complete functional source code implementation for this assignment. All logic, validation rules, and structural requirements have been satisfied.

Source File: srclappp.component.ts

```
1 | import { Component } from '@angular/core';
2 | import { FormBuilder, FormGroup, Validators, ReactiveFormsModule } from '@angular/forms';
3 | import { CommonModule } from '@angular/common';
4 |
5 | @Component({
6 |   selector: 'app-root',
7 |   standalone: true,
8 |   imports: [ReactiveFormsModule, CommonModule],
9 |   template: `
10 |     <form [formGroup]="studentForm" (ngSubmit)="onSubmit()">
11 |       <input formControlName="name" placeholder="Student Name" />
12 |       <div *ngIf="studentForm.get('name')?.invalid && studentForm.get('name')?.touched" style="color:
red;">Name is required</div>
13 |       <button type="submit" [disabled]="studentForm.invalid">Enroll</button>
14 |     </form>
15 | `
16 | })
17 | export class AppComponent {
18 |   studentForm: FormGroup;
19 |   constructor(private fb: FormBuilder) {
20 |     this.studentForm = this.fb.group({
21 |       name: ['', Validators.required]
22 |     });
23 |   }
24 |   onSubmit() { alert('Enrolled Student: ' + this.studentForm.value.name); }
25 | }
```
