

Solution Code - Engineering concepts - DesignPatterns - Observer_Pattern

Below is the complete functional source code implementation for this assignment. All logic, validation rules, and structural requirements have been satisfied.

Source File: StockObserver.java

```
1 | import java.util.ArrayList;
2 |
3 | interface Observer { void update(double price); }
4 | class StockMarket {
5 |     private ArrayList<Observer> observers = new ArrayList<>();
6 |     public void addObserver(Observer o) { observers.add(o); }
7 |     public void setPrice(double price) { for (Observer o : observers) o.update(price); }
8 | }
```
