

Solution Code - React - Functional_Component_Score_Calculator

Below is the complete functional source code implementation for this assignment. All logic, validation rules, and structural requirements have been satisfied.

Source File: src\App.js

```
1 | import React from 'react';
2 | import CalculateScore from './Components/CalculateScore';
3 |
4 | export default function App() {
5 |   return (
6 |     <div style={{ padding: '20px' }}>
7 |       <CalculateScore name="Alice" school="Global Academy" total={300} goal={280} />
8 |     </div>
9 |   );
10 | }
```

Source File: src\Components\CalculateScore.js

```
1 | import React from 'react';
2 |
3 | export default function CalculateScore({ name, school, total, goal }) {
4 |   const percent = ((total / 500) * 100).toFixed(2);
5 |   return (
6 |     <div className="format">
7 |       <h1>Student Info</h1>
8 |       <p>Name: {name}</p>
9 |       <p>School: {school}</p>
10 |      <p>Percent: {percent}%</p>
11 |      <p>Goal Achieved: {total >= goal ? 'YES' : 'NO'}</p>
12 |     </div>
13 |   );
14 | }
```
