

Solution Code - React - REST_API_Random_User_Fetch

Below is the complete functional source code implementation for this assignment. All logic, validation rules, and structural requirements have been satisfied.

Source File: src\App.js

```
1 | import React, { useEffect, useState } from 'react';
2 |
3 | export default function App() {
4 |   const [user, setUser] = useState(null);
5 |
6 |   useEffect(() => {
7 |     fetch('https://randomuser.me/api/')
8 |       .then(res => res.json())
9 |       .then(data => setUser(data.results[0]));
10 |   }, []);
11 |
12 |   return (
13 |     <div style={{ padding: '20px' }}>
14 |       {user ? (
15 |         <div>
16 |           <h3>{user.name.first} {user.name.last}</h3>
17 |           <p>Email: {user.email}</p>
18 |         </div>
19 |       ) : <p>Loading user...</p>}
20 |     </div>
21 |   );
22 | }
```
