

Solution Code - React - JSX_Office_Rental_CSS_Rent

Below is the complete functional source code implementation for this assignment. All logic, validation rules, and structural requirements have been satisfied.

Source File: src\App.js

```
1 | import React from 'react';
2 | import './custom.css';
3 |
4 | export default function App() {
5 |   return (
6 |     <div className="card">
7 |       <h2>Office Rental Info</h2>
8 |       <p className="highlight">Prime Location, 5000 Sq.Ft Available</p>
9 |     </div>
10 |   );
11 | }
```

Source File: src\custom.css

```
1 | .card {
2 |   padding: 15px;
3 |   border: 1px solid #ddd;
4 |   border-radius: 5px;
5 | }
6 | .highlight {
7 |   color: green;
8 |   font-weight: bold;
9 | }
```
