

PL/SQL Exercise 5: Triggers

Exercise 5: Triggers

Scenari- 1: Automatically update the last modified date when a customer's record is updated.

Question: Write a trigger `UpdateCustomerLastModified` that updates the `LastModified` column of the `Customers` table to the current date whenever a customer's record is updated.

Scenari- 2: Maintain an audit log for all transactions.

Question: Write a trigger `LogTransaction` that inserts a record into an `AuditLog` table whenever a transaction is inserted into the `Transactions` table.

Scenari- 3: Enforce business rules on deposits and withdrawals.

Question: Write a trigger `CheckTransactionRules` that ensures withdrawals do not exceed the balance and deposits are positive before inserting a record into the `Transactions` table.
