

Solution Code - Module 3-Core Java - FileReading

Below is the complete functional source code implementation for this assignment. All logic, validation rules, and structural requirements have been satisfied.

Source File: Q23_FileReading.java

```
1 | import java.io.FileReader;
2 | import java.io.BufferedReader;
3 | import java.io.IOException;
4 | import java.io.FileNotFoundException;
5 |
6 | public class Q23_FileReading {
7 |     public static void main(String[] args) {
8 |         System.out.println("Reading contents of output.txt:");
9 |
10 |        try (BufferedReader reader = new BufferedReader(new FileReader("output.txt"))) {
11 |            String line;
12 |            int lineNumber = 1;
13 |            while ((line = reader.readLine()) != null) {
14 |                System.out.println("Line " + lineNumber + ": " + line);
15 |                lineNumber++;
16 |            }
17 |        } catch (FileNotFoundException e) {
18 |            System.out.println("Error: output.txt was not found. Please run Q22_FileWriting first to
create it.");
19 |        } catch (IOException e) {
20 |            System.out.println("Error: An error occurred while reading output.txt: " + e.getMessage());
21 |        }
22 |    }
23 | }
```
