

Solution Code - React - Events_Increment_Decrement_Currency

Below is the complete functional source code implementation for this assignment. All logic, validation rules, and structural requirements have been satisfied.

Source File: src\App.js

```
1 | import React, { useState } from 'react';
2 |
3 | export default function App() {
4 |   const [usd, setUsd] = useState(1);
5 |   return (
6 |     <div style={{ padding: '20px' }}>
7 |       <h2>USD to INR Converter</h2>
8 |       <input type="number" value={usd} onChange={(e) => setUsd(e.target.value)} />
9 |       <p>Value in INR: {usd * 83} INR</p>
10 |     </div>
11 |   );
12 | }
```
