

Solution Code - Engineering concepts - DesignPatterns - Decorator_Pattern

Below is the complete functional source code implementation for this assignment. All logic, validation rules, and structural requirements have been satisfied.

Source File: NotifierDecorator.java

```
1 | interface Notifier { void send(String msg); }
2 | class EmailNotifier implements Notifier { public void send(String msg) { System.out.println("Email: " +
msg); } }
3 |
4 | abstract class NotifierDecorator implements Notifier {
5 |     protected Notifier decorated;
6 |     public NotifierDecorator(Notifier n) { this.decorated = n; }
7 |     public void send(String msg) { decorated.send(msg); }
8 | }
9 |
10 | class SMSNotifier extends NotifierDecorator {
11 |     public SMSNotifier(Notifier n) { super(n); }
12 |     public void send(String msg) { super.send(msg); System.out.println("SMS: " + msg); }
13 | }
```
