

Solution Code - Module 3-Core Java - FileWriting

Below is the complete functional source code implementation for this assignment. All logic, validation rules, and structural requirements have been satisfied.

Source File: Q22_FileWriting.java

```
1 | import java.util.Scanner;
2 | import java.io.FileWriter;
3 | import java.io.BufferedWriter;
4 | import java.io.IOException;
5 |
6 | public class Q22_FileWriting {
7 |     public static void main(String[] args) {
8 |         Scanner scanner = new Scanner(System.in);
9 |         System.out.print("Enter a string to write to output.txt: ");
10 |
11 |         if (scanner.hasNextLine()) {
12 |             String input = scanner.nextLine();
13 |
14 |             // Writing to output.txt
15 |             try (BufferedWriter writer = new BufferedWriter(new FileWriter("output.txt"))) {
16 |                 writer.write(input);
17 |                 System.out.println("Success: Data has been successfully written to output.txt.");
18 |             } catch (IOException e) {
19 |                 System.out.println("Error: An error occurred while writing to output.txt: " +
e.getMessage());
20 |             }
21 |         } else {
22 |             System.out.println("Error: No input entered.");
23 |         }
24 |
25 |         scanner.close();
26 |     }
27 | }
```
