

Solution Code - Spring Data JPA with Hibernate - Transaction_Rollback_Testing

Below is the complete functional source code implementation for this assignment. All logic, validation rules, and structural requirements have been satisfied.

Source File: `src\main\java\com\example\jpa\JpaApplication.java`

```
1 | package com.example.jpa;
2 |
3 | import org.springframework.boot.SpringApplication;
4 | import org.springframework.boot.autoconfigure.SpringBootApplication;
5 | import org.springframework.stereotype.Service;
6 | import org.springframework.transaction.annotation.Transactional;
7 | import org.springframework.beans.factory.annotation.Autowired;
8 |
9 | @Service
10 | class CustomerService {
11 |     @Autowired
12 |     private CustomerRepository repo;
13 |
14 |     @Transactional
15 |     public void saveWithRollback(Customer c) {
16 |         repo.save(c);
17 |         throw new RuntimeException("Force rollback trigger");
18 |     }
19 | }
20 |
21 | @SpringBootApplication
22 | public class JpaApplication {
23 |     public static void main(String[] args) {
24 |         SpringApplication.run(JpaApplication.class, args);
25 |     }
26 | }
```
