

Solution Code - Module 2-ANSI SQL Using MySQL - User_Engagement_Index

Below is the complete functional source code implementation for this assignment. All logic, validation rules, and structural requirements have been satisfied.

Source File: [solution.sql](#)

```
1 | SELECT u.full_name, COUNT(DISTINCT r.event_id) as attended_count, COUNT(DISTINCT f.feedback_id) as  
feedbacks_submitted FROM Users u LEFT JOIN Registrations r ON u.user_id = r.user_id LEFT JOIN Feedback f ON  
u.user_id = f.user_id GROUP BY u.user_id;
```
