

PL/SQL Exercise 4: Functions

Exercise 4: Functions

Scenari- 1: Calculate the age of customers for eligibility checks.

Question: Write a function CalculateAge that takes a customer's date of birth as input and returns their age in years.

Scenari- 2: The bank needs to compute the monthly installment for a loan.

Question: Write a function CalculateMonthlyInstallment that takes the loan amount, interest rate, and loan duration in years as input and returns the monthly installment amount.

Scenari- 3: Check if a customer has sufficient balance before making a transaction.

Question: Write a function HasSufficientBalance that takes an account ID and an amount as input and returns a boolean indicating whether the account has at least the specified amount.
