

Algorithm 7: Financial Forecasting

Exercise 7: Financial Forecasting

Scenario:

You are developing a financial forecasting tool that predicts future values based on past data.

Steps:

Understand Recursive Algorithms:

Explain the concept of recursion and how it can simplify certain problems.

Setup:

Create a method to calculate the future value using a recursive approach.

Implementation:

Implement a recursive algorithm to predict future values based on past growth rates.

Analysis:

Discuss the time complexity of your recursive algorithm.

Explain how to optimize the recursive solution to avoid excessive computation.
